## PROFILE

Creative and highly-motivated engineer with eyes specifically made for catching all the bugs! I am looking for a diverse, remote-first company where I can satisfy my thirst for learning.

## EMPLOYMENT HISTORY

### QA Engineer at Tigra, Budapest

July 2021 — Present

- Working in cross-functional, agile teams on new feature development and maintenance of highly-sensitive financial and government software
- Monitor product development and product usage with a perspective toward improving product quality
- Responsible for defining and implementing the testing strategy
- Identify and report bugs found during testing and work with developers to ensure that requirements are met
- Automate tests whenever possible using testing frameworks
- Complete regression tests before new releases and bug fixes
- Create release notes

### Integrations Engineer at PrefixBox, Budapest

November 2019 — July 2021

- Plan, integrate, and test the e-commerce search solutions using HTML, CSS, and JavaScript
- Deploy solutions and ensure that it meets the customer's needs and requirements
- Work closely with customers to help them improve their UX and UI

### Junior Software Engineer at DreamJo.bs, Budapest & Prague

May 2019 — October 2019

- Front-end development on the company's two main websites using HTML, CSS, and JavaScript

## EDUCATION

### Software Engineer Bootcamp at Green Fox Academy, Budapest

May 2018 — September 2018

### Eötvös Loránd University at BA in Early Childhood Education, Budapest

September 2015 — May 2019

## HOBBIES

Sketching & painting, reading, board games, providing emotional support to my partner when his RC planes crash
